Setting Up Integration Options

This guide assumes that you have already logged in and successfully installed InstaMember to your wordpress site.

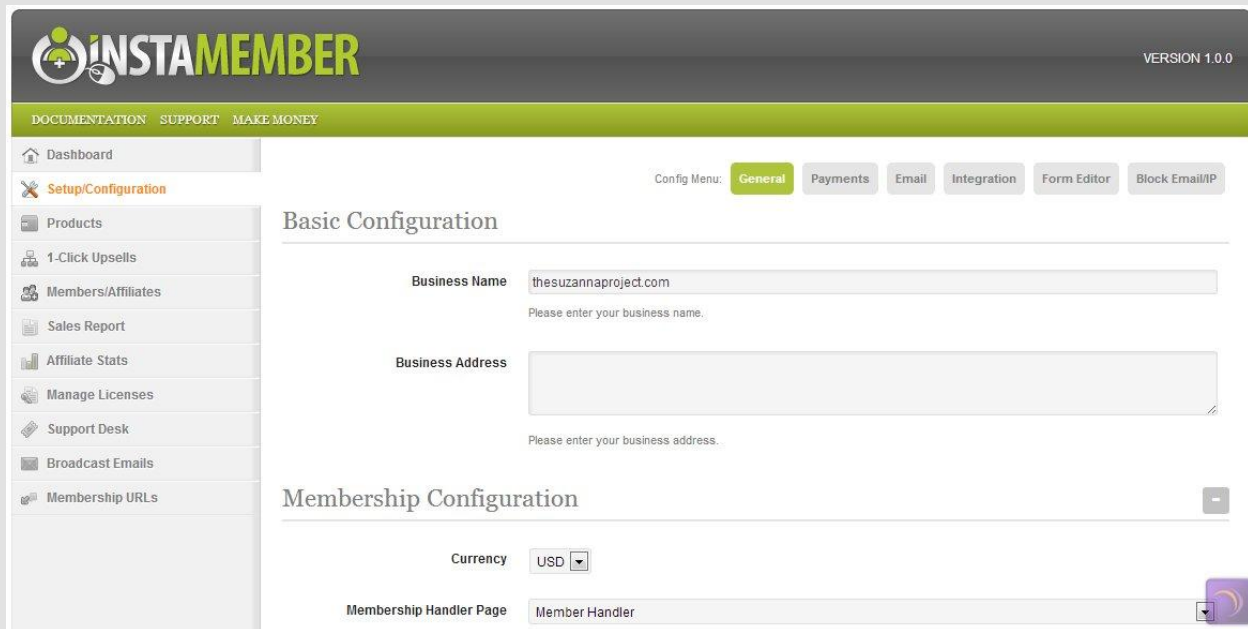

1. Navigate to your Instamember Dashboard by clicking the **Instamember** menu option on your wordpress dashboard.

2. Click '**Setup/Configuration**' to start setting up your InstaMember powered site.

3. Once clicked, you should see the setup/configuration page similar to this image

The screenshot shows the INSTAMEMBER dashboard with the 'Setup/Configuration' menu item selected. The 'Basic Configuration' tab is active in the 'Config Menu'. The 'Business Name' field contains 'thesuzannaproject.com'. The 'Business Address' field is empty. The 'Membership Configuration' section shows 'Currency' set to 'USD' and 'Membership Handler Page' set to 'Member Handler'.

Autoresponder Integrations

Aweber GetResponse MailChimp iContact ConstantContact ImnicaMail InfusionSoft

Consumer Key
Register or login to Aweber Developer Labs and create an application, then enter your app Consumer Key here.

Secret Key
Please enter the Consumer Secret Key of your Aweber's application.

Other Integrations

The screenshot shows the 'Other Integrations' settings page. At the top, there are three tabs: 'Amazon Web Services' (selected), 'Facebook', and 'reCaptcha'. Below the tabs, there are three text input fields: 'AWS Access Key ID', 'AWS Secret Access Key', and 'S3 Bucket Name'. Below the 'S3 Bucket Name' field, there is a small text instruction: 'In order to protect your files on S3, please enter the bucket's name here.' At the bottom right of the form, there is a green button labeled 'Update Settings'.

5. The first section of the integration feature of InstaMember is the integration to the different autoresponders. Each autoresponder requires different data to be supplied to successfully integrate it with InstaMember. The required data is supplied with instructions on where to get the information needed for each field.

6. InstaMember also supports other integrations:

- **Amazon Web Services** – enter the bucket name on the **S3 Bucket Name** text field to protect the files within that bucket/folder.
- **Facebook** - requires that you create first a facebook application (<https://developers.facebook.com/apps>) then get the application ID to paste into the field.

Other Integrations

The screenshot shows the 'Other Integrations' settings page with the 'Facebook' tab selected. Below the tabs, there is a text input field labeled 'Facebook :: Application ID'. Below this field, there is a small text instruction: 'Create a Facebook application, and enter the Application ID here.' At the bottom right of the form, there is a green button labeled 'Update Settings'.

- 7. reCaptcha** – we hate spam as much as you do. And in order to address this concern, InstaMember has the feature of reCaptcha integration. Sign up for reCaptcha if you don't have an account yet, [here](#).

Other Integrations

Amazon Web Services

Facebook

reCaptcha

reCaptcha :: Public Key

reCaptcha :: Private Key

Update Settings

- 8.** Once you are done setting up the integrations of your preference, save or update these changes.
