Table of Contents	3
InstaMember Page Protection	4
Credits & Contact Page	7

InstaMember Page Protection

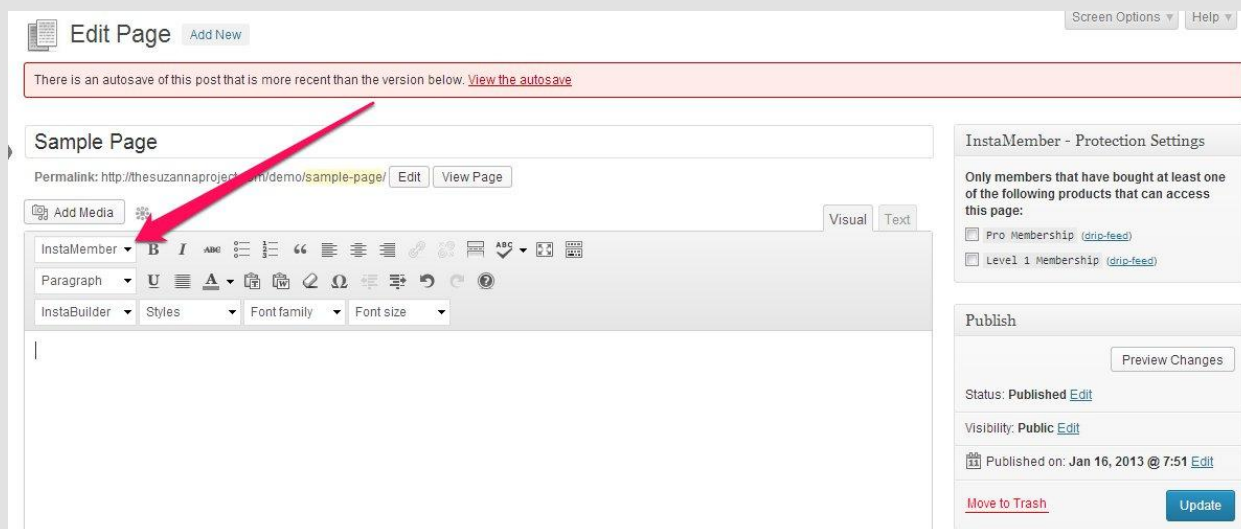

1. Login to your wordpress admin area.
2. Go to the list of **Pages** or **Posts** you want to apply page protection.
3. Create or edit a page or post which you would like to apply page protection.
4. On the right-hand side of your page or post editor you will see the **InstaMember – Protection Settings** tab.

5. Select from the list of membership levels available on this tab that will be given access to this page or post by checking the checkbox. You can choose more than one if applicable. If you decide to keep this page unchecked, it would be visible even to nonmembers of any of the membership levels.
6. When you are done editing, click the **Publish** or **Update** button under the publish tab to apply the settings you have made on the **InstaMember Protection Settings**.

InstaMember Shortcodes

1. Login to your wordpress admin area.
2. Go to the specific page you want to apply InstaMember shortcodes
3. You can **ONLY** access the **InstaMember Shortcodes** when you have your page editor in **Visual Editor** mode.

4. Choose from the dropdown the shotcode you want to use in this specific page. Below is the list of shortcodes and how they work on the site.
 - **Protection Section** – any content enclosed inside this shortcode will prompt the user to order to access the content. Insert the product id(s) on "PRODUCT_ID_HERE" of the membership level(s) allowed to access the content. You may also customize the **message (msg)** that the nonmembers will see. **Note:** Edit contents in between the double quotes. **DO NOT** remove the double quotation marks.
[insta_protect ids="PRODUCT_ID_HERE" msg="This is a member only content. "]Order Now[/insta_protect]
 - **Download Link** – replace **YOUR_FILE_NAME.zip** with the actual filename including the file extension of the downloadable file of this page. In between the shortcodes, you can edit the anchor text of this download link.
[insta_download file="YOUR_FILE_NAME.zip"]Click Here To Download[/insta_download]
 - **S3 Download Link** – this will generate a download link shortcode specifically for s3. **Note:** You must have Amazon s3 successfully setup in the **integration** option of

Setup/Configuration page. Leave the download type = "s3" and do not edit or remove it. Replace **YOUR_FILE_NAME.zip** with the actual filename including the file extension of the downloadable file of this page. In between the shortcodes, you can edit the anchor text of this download link
[insta_download type="s3" file="YOUR_FILE_NAME.zip"]Click Here To Download[/insta_download]

- **S3 Video** – this shortcode will enable video player for videos hosted in Amazon s3. Replace only the video file name with the exact file name and video format extension. You can also customize the height and the width of the player according to your preference. Furthermore, you have the option to autoplay the video and autohide the video player controls. By default, the value is set to 1 which returns true, meaning that the video autoplays and autohides the controls automatically. If you would like to turn it off, you may replace one with 0.
[insta_s3_video player="flowplayer" file="YOUR_VIDEO_FILE_NAME.mp4" width="640" height="360" autoplay="1" autohide="1"]
- **License Key** – this will generate a license key for a licensed product whose ID you will specify on the shortcode.
[insta_license id="PRODUCT_ID_HERE"]
- **Normal Text Registration Link** – this shortcode will handle the registration using text link. Specify the product ID and the payment method (**Note:** you should have at least one successful payment method setup in the payments option of setup/configuration). You may also customized the anchor text of the registration link to your liking.
[insta_link id="PRODUCT_ID_HERE" payment="PAYMENT_METHOD_HERE" target="_self"]Order Now[/insta_link]
- **Normal Image Registration Link** – this shortcode makes use of an image as an anchor to register to a product. Specify the product ID and the payment method (**Note:** you should have at least one successful payment method setup in the payments option of setup/configuration). Replace **YOUR_IMAGE_URL_HERE** with the link of the image you would like to use as an anchor to the registration link.
[insta_link id="PRODUCT_ID_HERE" payment="PAYMENT_METHOD_HERE" target="_self"]YOUR_IMAGE_URL_HERE[/insta_link]
- **Reg/Payment Buttons** – there are several buttons you can choose from depending on your preference. You can use this shortcode to handle the registration or payment process. Specify

the product ID and the payment method (**Note:** you should have at least one successful payment method setup in the payments option of setup/configuration).

```
[insta_pay_button id="PRODUCT_ID_HERE"
```

```
color="orange_addtocart" payment="PAYMENT_METHOD_HERE" target="_self"]
```

- **Autoswitch Payment Buttons** - there are several buttons you can choose from depending on your preference. You can use this shortcode to handle automatic registration or payment process. Specify the product ID.

```
[insta_autoswitch_button id="PRODUCT_ID_HERE"
```

```
color="orange_addtocart"]
```

- **Global Affiliate Link** – insert this shortcode to generate affiliate links to all products where affiliate program is applicable.

```
[insta_aff_link]
```

- **Product Affiliate Link** – insert this shortcode if you would like to generate product specific affiliate links. Just replace **PRODUCT_ID_HERE** with that specific product ID.

```
[insta_aff_link id="PRODUCT_ID_HERE"]
```

- **Affiliate Link with Custom Landing Page** – insert this shortcode if you have a specific landing page for affiliates. Replace the **LANDING_PAGE_URL_HERE** with the actual url of your affiliate landing page. Must include http://

```
[insta_aff_link url="LANDING_PAGE_URL_HERE"]
```

- **Affiliate Banner** – insert this shortcode to add an affiliate banner for affiliates to use. Replace **BANNER_URL_HERE** with the actual url of the image. Customize the width and height according to your preference. Replace **PRODUCT_ID_HERE** with the product ID of which this is applicable.

- ```
[insta_aff_banner image="BANNER_URL_HERE" width="468" height="60" id="PRODUCT_ID_HERE"]
```

- **Affiliate Swipe** – use this shortcode if you would like to enable affiliate swipes to the products you offer affiliate programs. Simply replace the **SWIPE\_SUBJECT\_HERE** with the actual subject you want to appear and replace **YOUR\_SWIPE\_CONTENT\_HERE** with your actual swipe content.

```
[insta_aff_swipe
```

```
subject="SWIPE_SUBJECT_HERE"]YOUR_SWIPE_CONTENT_HERE[/insta_aff_swipe]
```

- **Discount Order Form** – use this shortcode to make visible your discount order form. Simply replace **DISCOUNT\_ID\_HERE** with the ID of the discount you have specifically set on the discounts page on the InstaMember settings.

```
[insta_discount id="DISCOUNT_ID_HERE"]
```
